

# TOUCHWORKS® EHR 2025.1

## Commitment to enhancing the client experience.

We're excited to share these requested features and enhancements **available Feb. 4, 2025.**

**Improved usability of Clinicals and Demographics in the Patient Profile Dialog**, including better information proximity, improved spacing and alignment, clearer labels and enhanced multi-select fields for Race and Ethnicity.

**Ensure compliant data exchange** for USCDI-v3 standards with support for Date of Death and medication Indications in CCDA documents, as well as Regulatory LOINC for Orderable Items in CCDA and FHIR.

**Stay current with additional USCDI-v3 required demographic values** for gender identity and sexual orientation, and Tribal Affiliation information easily accessed from Patient Profile Dialog.

Quickly **view comprehensive insurance coverage details with additional fields** required by USCDI-v3 conveniently displayed on Patient Profile Dialog.

Get ahead on **regulatory compliance with USCDI-v5 standards for pronouns.**

**Save time with faster load times for Order Details** from Worklist when there are numerous resultable items.

**Save time by opening the Match Patient Dialog directly from Inbox**, eliminating extra navigation for Rx Renew or Rx Change Request tasks.

**Ensure timely and accurate billing** with corrected "When to Charge" values in Order Details, preventing missed automatic charges.

Improve communication by **directly typing into Performing Instructions and Patient Instructions fields in Order Details**, thanks to enhanced browser compatibility.

**Ease patient identification with an enlarged photo view** in the Patient Profile Dialog and banner, along with a default avatar for missing photos.

**Increase productivity in ordering workflows** with reduced load times for active orders in the Orders tab of Add Clinical Item, enabling quick patient order entry.

**Navigate patient charts faster with improved order node responsiveness**, especially for patients with extensive active orders.

**Expand your Resultable Item dictionary without interruptions**, enabling multiple entries to be added seamlessly.

Gain better insight with **fully visible annotation timestamps on lab order print previews.**

**Enhance workflow efficiency with seamless access to Note Preview**, eliminating unresponsiveness when switching between notes in Chart Preview.

# TouchWorks EHR 2025.2 and later

## What's Next? A sneak peek of what is *coming soon*.

Altera is focused **on planning the next release of TouchWorks® EHR**, providing exciting enhancements and keeping satisfaction at the heart of meeting regulatory requirements. No hot fixes are planned. Be sure to attend [the quarterly client webinars](#) for the upcoming blueprint.

### Planned for 2025.2 and later

**Replace current Problem terminology with MEDCIN**

**Continued progress on AI-enabled Note**

**Continued progress on Integrated Scan**

**Regulatory:** USDCI continuation and progress towards certified regulatory compliance

### Help shape the TouchWorks EHR solution

Join our **TouchWorks EHR Feature Feedback and Mastermind Webinars!**

We want to hear your thoughts and feedback on the proposed new feature requirements and design for TouchWorks EHR. The Mastermind sessions give you (our clients) the opportunity to ask questions about TouchWorks EHR and its future.

The sessions are open to all clients and user roles, and the meetings will be interactive to give us (and you) an opportunity to talk with and hear from other TouchWorks EHR clients.

View the webinar schedule [here](#) (a Client Portal login is required).
