TOUCHWORKS® EHR 2025.3

Altera DIGITAL HEALTH

Commitment to enhancing the client experience.

We're excited to share these requested features and enhancements **available Jul. 8, 2025.**

Integrated Scan replaces legacy tools with embedded TouchWorks workflows, enabling secure scanning, error recovery, and future-ready enhancements with minimal disruption.

Reduce documentation burden and refocus on patient care with **TouchWorks Note+** leveraging AI-driven ambient listening, dictation, and keyboard entry to generate structured and codified clinical documentation.

Enrich and personalize patient communication by **displaying the 'Preferred Name' on the patient banner and optionally in print templates**.

Get ahead on regulatory compliance with upcoming standards **replacing 'Birth Sex** with **'Clinical Use Sex'** in patient profiles and preferences.

Meet USCDI v3 standards by **designating and documenting results as Disability Status health status assessments** to better understand patient needs.

Ensure interoperability with future standards by allowing **classification of TouchWorks orders to a regulatory category.**

Enhance problem list management with **reinstated problem conversion and transition options, and new 'Refine Problem' functionality** for improved searching.

Enforce completeness and standardization in charting **by requiring anatomical site information when documenting injectable locally-defined vaccines.**

Efficiently resolve 'stuck' tasks **with the reinstated 'Entered in Error' option for unmatched patients and overdue orders.**

Reliably print immunizations recorded with a non-specific 'fuzzy' administered date from Immunization Viewer.

Record precise doses with up to three decimal places, eliminating workarounds and enhancing accuracy.

Reduce administrative overhead **by preventing unnecessary encounter creation when viewing Rx Renew Request tasks.**

Enhance usability and efficiency **with fixes for HMP Flowsheets, including auto-refresh on specialty change, seamless access to context menus, blank row handling, and easy column additions.**

Speed up allergy management **with faster, more accurate allergen identification with improved keyword search at both organization and personal levels.**

Enhance clarity when reviewing patient vitals by displaying full year values in column headers, eliminating the need to hover for date details and streamlining data interpretation.

Improve search efficiency and user experience with **better handling of rapid entry in medication and order searches in Add Clinical Item**.

Coming soon for TouchWorks EHR
What's Next? A sneak peek of what is ***coming soon***.

Altera is focused **on planning the next release of TouchWorks® EHR**, providing exciting enhancements and keeping satisfaction at the heart of meeting regulatory requirements. No hot fixes are planned. Be sure to attend **the quarterly client webinars** for the upcoming blueprint.

Regulatory: 2025.3 FHIR supplemental release

Client enhancements

Replace current Problem terminology with MEDCIN

Help shape the TouchWorks EHR solution

Join our **TouchWorks EHR Feature Feedback and Mastermind Webinars!**

We want to hear your thoughts and feedback on the proposed new feature requirements and design for TouchWorks EHR. The Mastermind sessions give you (our clients) the opportunity to ask questions about TouchWorks EHR and its future.

The sessions are open to all clients and user roles, and the meetings will be interactive to give us (and you) an opportunity to talk with and hear from other TouchWorks EHR clients.

View the webinar schedule **here** (a Client Portal login is required).
