Key Updates You Need to Know

Schedule, Prepare and Plan for Success!

A close-up photograph of a woman with curly hair, wearing a blue top, smiling and looking down at a tablet device she is holding. The background is slightly blurred.

Your Feedback in Action

In our Spring NPS survey, you asked for improvements in stability, support, and transparency. Here's how we're responding.

Platform Stability

We expanded automation and continuous testing, driving more predictable, reliable releases.

Support Experience

AI-powered tools, dedicated Support Leads, and a new structure for faster, more consistent responses.

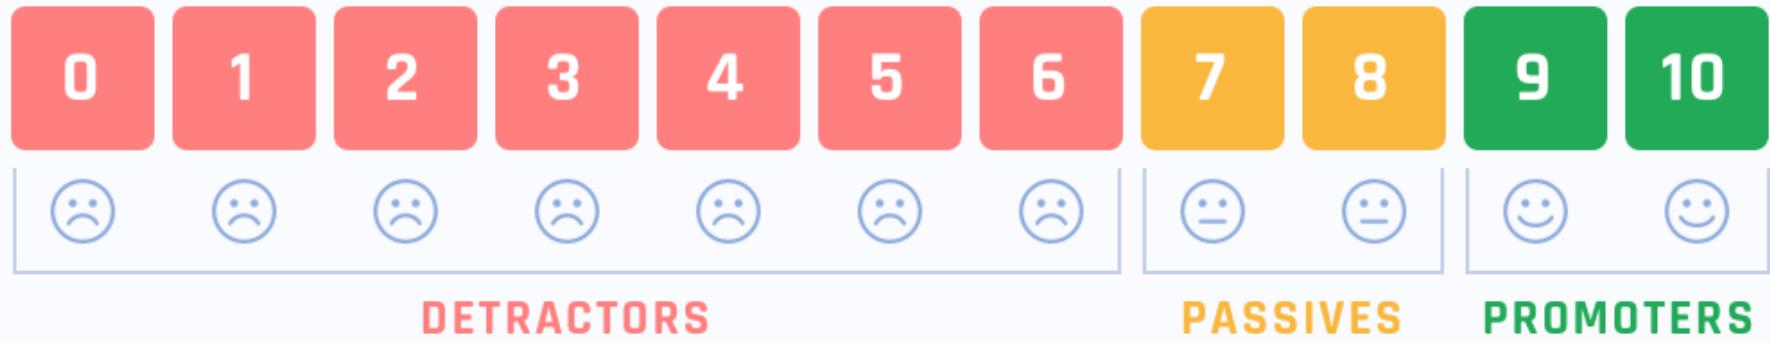

Partnership & Transparency

More opportunities to shape priorities – through feature input sessions, sharper quarterly webinars, and upcoming Strategic Partnership Reviews.

Your Feedback Shapes Our Direction

Fall NPS Survey Launches **Oct 14th**

Integrated Scan Prep

The screenshot shows the TouchWorks Client Portal homepage. At the top, there is a navigation bar with links for Home, Support, My Products, Product Documentation, Community, and Training. A search bar is also present. On the right side of the header, there is a user icon with the number 1830. Below the header, a breadcrumb navigation shows the user is on the TouchWorks page, specifically the 'Introducing Integrated Scan: A New Era for TouchWorks Document Management' blog post. The main content area features a blog post by Rob Sloan, titled 'Introducing Integrated Scan: A New Era for TouchWorks Document Management'. The post discusses the upcoming release of TouchWorks 2025.3, which includes Integrated Scan functionality. It highlights the transformational update in streamlining document management within the EHR system. The post also provides instructions for preparation, mentioning 'act now' and 'immediate action'. Below the post, there is a section titled 'What is Integrated Scan?' which explains that Integrated Scan replaces the legacy TouchChart application with a modern, AI-ready platform for batch and direct-to-patient scanning workflows. It lists key benefits including streamlined workflows, enhanced accessibility, and future-ready design. A section titled 'Preparing for a Smooth Transition' provides steps for proactive preparation, linking to a recent instructional video. On the right side of the page, there is a sidebar titled 'My Forums' which shows a 'TouchWorks' forum with a 'View All Forums' link. Below this is a 'Featured Content' section that lists several other blog posts from the TouchWorks category, each with a thumbnail, title, and brief description.

Introducing Integrated Scan: A New Era for TouchWorks Document Management

by Rob Sloan **ENTHUSIAST**
created 05/07/2025 03:22 PM · (edited 05/08/2025 02:37 PM) in **TouchWorks**

Introducing Integrated Scan: A New Era for TouchWorks Document Management

We are thrilled to announce the upcoming release of TouchWorks 2025.3, featuring the highly anticipated **Integrated Scan** functionality. This transformative update marks a significant leap forward in streamlining document management within the TouchWorks Electronic Health Record (EHR) system. By embedding scan capabilities directly into the EHR, Integrated Scan eliminates the need for separate applications, simplifies workflows, and enhances efficiency for your clinical teams.

To kick off your preparation for Integrated Scan in TouchWorks 2025.3, **act now** by reviewing the instructional video and starting the cleanup of file cabinets, unmapped folders, and open batch scans as outlined in the provided resources. **Immediate action** is critical to ensure a smooth transition and avoid disruptions during activation.

What is Integrated Scan?

Integrated Scan replaces the legacy TouchChart (ImpactMD) application with a modern, AI-ready platform that seamlessly integrates batch and direct-to-patient scanning workflows. This built-in solution allows users to capture, categorize, and file documents without toggling between systems or managing separate logins. The result? A more cohesive and efficient experience within the familiar TouchWorks environment.

Key benefits include:

- **Streamlined Workflows:** Document management is now fully embedded in the EHR, reducing complexity and saving time.
- **Enhanced Accessibility:** Scan and file documents directly to patient charts without leaving the clinical workspace.
- **Future-Ready Design:** Built with AI capabilities in mind, Integrated Scan is poised to support evolving healthcare needs.

Preparing for a Smooth Transition

The rollout of Integrated Scan requires proactive preparation to ensure a seamless transition. To help you get ready, we've outlined critical pre-engagement steps in our recent instructional video ([available here](#)). These steps focus on cleaning up existing data in TouchChart, including file cabinets, unmapped folders, and open batch scans, to align with the new system's structure.

2025 Regulatory Update

The screenshot shows the Client Portal homepage with a dark blue header. The header features a logo with a red and white square icon and the text "Client Portal". To the right of the logo is a search bar with the placeholder "Search All Content" and a magnifying glass icon. Below the search bar are navigation links: "Home", "Support >", "My Products >", "Product Documentation >", "Training >", and a notification badge with the number "125".

The main content area has a white background. At the top left, there is a "PRODUCT ALERT" button with a lightning bolt icon. To the right of the alert are "Subscribe" and "..." buttons. The main title of the alert is "2025 Reporting Period - Potential Action Needed". Below the title, it says "by David Guay ENTHUSIAST" and "created 08/12/2025 02:07 PM in TouchWorks".

The alert content starts with "TouchWorks Clients," followed by a paragraph about a CCD (CCDA) issue identified during an ONC certification review. It mentions that CCDs generated via API were missing required sections: Assessment Narrative, Plan Narrative, and Clinical Notes. A fix for this issue is available in version 2025.3 and later, starting with version 2024.3.

What This Means for You

To be compliant, you must be on a certified version of TouchWorks during your 180-day reporting period.

- If your original reporting period began before July 4, 2025, and you were using version 2024.3, you must take the CCD hotfix and select a new continuous 180-day period to be compliant
- If your reporting period is July 4 to December 31, 2025, and you are using version 2024.3, you must take the CCD

On the right side of the page, there is a sidebar with a "My Forums" section containing a "TouchWorks" item and a "View All Forums" link. Below that is a "Featured Content" section with three items: "Stay connected with TouchWorks", "Prepare for 2025.3 Upgrade", and "Smooth Transition to 2025".

Release Insights

- <https://go.alterahealth.com/touchworks-releaseinsights>

Commitment to enhancing the client experience.

We're excited to share these requested features and enhancements **available Jul. 8, 2025.**

Integrated Scan replaces legacy tools with embedded TouchWorks workflows, enabling secure scanning, error recovery, and future-ready enhancements with minimal disruption.

Enrich and personalize patient communication by **displaying the 'Preferred Name' on the patient banner and optionally in print templates.**

Meet USCDI v3 standards by **designating and documenting results as Disability Status health status assessments** to better understand patient needs.

Enhance problem list management with **reinstated problem conversion and transition options, and new 'Refine Problem' functionality** for improved searching.

Efficiently resolve 'stuck' tasks with the **reinstated 'Entered in Error' option for unmatched patients and overdue orders.**

Record precise doses with up to three decimal places, eliminating workarounds and enhancing accuracy.

Reduce documentation burden and refocus on patient care with **TouchWorks Note+** leveraging AI-driven ambient listening, dictation, and keyboard entry to generate structured and codified clinical documentation.

Get ahead on regulatory compliance with upcoming standards **replacing 'Birth Sex' with 'Clinical Use Sex'** in patient profiles and preferences.

Ensure interoperability with future standards by allowing **classification of TouchWorks orders to a regulatory category.**

Enforce completeness and standardization in charting by **requiring anatomical site information when documenting injectable locally-defined vaccines.**

Reliably print immunizations recorded with a non-specific 'fuzzy' administered date from Immunization Viewer.

Reduce administrative overhead by **preventing unnecessary encounter creation when viewing Rx Renew Request tasks.**

Note+ With Ambient Listening

Note+ will continue to expand with new capabilities

- Core enhancements (Quippe forms, outputs, templates) with a Note+ with Ambient Listening subscription.
- Advanced AI-driven features (e.g., smart ordering, TouchWorks Studio). Final packaging details will be shared before each release

2025.4 Highlights

- TW Mobile as an ambient listening device – mobile transcript
- Security for non licensed users to start and edit note (without AI and Ambient)
- User directed, custom AI prompt updates to select note sections
- Ambient listening note update features
- Cite all/remove all options
- Proof of concept, TouchWorks Studio demonstration
- Displaying multiple vitals
- Ability to voice - dictate in entry pad
- Phase 1 of Mobile Photos

From 2025.4 Into 2026: Capabilities to Help Care Teams Thrive

Meaningful Enhancements

- Medication Search
- Patient Preferred Lab
- Pharmacy and Lab Display ACI/Chart Component
- Immunization Grid Most Recent to Oldest
- Referral Faxing Enhancements
- Rename Inbound Documents
- HCC Enhancements

Building the Foundation for AI

- AI Prompt Infrastructure
- TouchWorks Studio -
- AI Feature Enhancements
- Problem Conversion Map

Reporting and Insights That Matter

- Interoperability
- Gaps in Care
- Incidental Finding Tracking
- Ad Hoc Reporting
- Compliance Programs

2025.4 Enhancements You Asked For

- New Option to default patient preferred lab in patient profile
- Patient pharmacies and preferred lab display on clinical desktop components and ACI and Banner*
 - Landmark Display, “Confirm” to update last updated date
- Ability to fax medication list (or medication profile)
- Fax dialogs default to referring provider
- Immunization grid view most recent to oldest
- **Ability to fax referral order requisition and attachments
- Orders Chart Viewer Component – order by type now displayed by (OID) order type classification
- Admin tool color options to differentiate test, prod, etc
- Pharmacy Search – filtered incremental search in site
- Rename Direct Message Imported CCD XML manifestations
- HCC configuration to display v28 only, tool tip improvements
