

Sunrise Ambulatory Care 25.1

Sunrise™ Ambulatory Care 25.1 includes an array of new features aimed at enhancing the provider experience by providing easier access to data and minimising clicks for greater efficiency. Save time and optimise workflows with improved data views and automation, all designed to boost your organisation's performance.

Key enhancements:

Patient management—Drives cleaner patient management with a unified list for appointments and walk-ins, along with easy location viewing. Enhanced visual cues and improved clinician assignments simplify workflows, while new mini-views enable quick switching between patients with a single click, boosting overall efficiency.

Uplifted message view—Enhances communication and workflow efficiency with real-time threaded conversations, streamlined in/outbox management and the option to pin important messages for quick access.

Schedule-at-a-glance—Optimises your organisation with a quick-list view of provider schedules, easy access to appointment details and patient summaries, real-time patient status updates and single-click access to patient records, all to enhance efficiency and patient care.

New Scan and Fax solutions—Improves operational efficiency with enhanced document handling that automatically sorts inbound faxes into queues. Enables faxes to be attached to referrals and recipient selection from Sunrise, an address book, or custom entries. Benefit from point-of-care scanning and barcode integration for streamlined processes.
