

Sunrise 25.1 Clinicals

Sunrise™ 25.1 Clinicals enhances the healthcare experience by streamlining clinician workflows, promoting efficiency and satisfaction, prioritising patient safety, streamlining configuration and management, and automating administrative tasks—helping clinicians focus more on patient care through real-time insights and simplified workflows.

Key enhancements:

Results—Delivers the ability to annotate multiple results within a single workflow, streamlining workflows along with enhanced filtering capabilities, enabling providers to swiftly access critical information, enhancing care quality.

Preferred name and pronouns—Includes fields for preferred names and pronouns, fostering more personalised care, increasing patient satisfaction by ensuring their preferences are recognised.

Configuration tools—Offers an uplifted user interface with sophisticated search capability to simplify access to settings, which in turn enables modification to enhance the overall user experience.
