

Sunrise Financial Manager 25.1

Sunrise™ Financial Manager 25.1 introduces powerful automation and streamlined workflows designed to enhance financial performance, improve billing accuracy and simplify revenue management. With new centralized billing tools, enhanced denial and appeals tracking, and automated provider-level adjustments, managing revenue has never been easier.

Key enhancements:

EPISODE MANAGEMENT AND BILLING

Billing Hub—Offers a newly centralized “One-stop Shop” that consolidates billing requests, claims and self-pay into three easily accessible tabs, streamlining financial management.

Receivables and A/R management—Optimizes workflows to simplify episode tracking and increase follow-up efficiency, improving cash flow.

Claims processing—Delivers new denial indicators, claim-aging visibility, and actionable insights that reduce manual effort and improve revenue cycle efficiency.

APPEALS AND DENIALS MANAGEMENT

Appeals initiation—Automatically creates appeals during remittance processing, reducing delays and accelerating reimbursement.

Tracking and usability—Provides new workflows and UI improvements to simplify appeal management and increase transparency.

Denials tracking—Offers a complete history of denials and appeals that ensures better tracking and faster resolution.

PROVIDER-LEVEL ADJUSTMENTS AND FINANCIAL ACCURACY

PLB Processing—Automates provider-level adjustments in 835 remittances, eliminating manual entry and reducing errors.

Penalties, interest and bonus payments—Ensures accurate financial postings without manual intervention.

General ledger reporting—Improves financial accuracy with direct interfacing to the general ledger.
