TOUCHWORKS® EHR 2025.2

Commitment to enhancing the client experience.

We're excited to share these requested features and enhancements **available Apr. 2, 2025.**

Enhance patient care by identifying and viewing Social Determinants of Health (SDOH) goals with the new 'SDOH Goal' sub-order type, aligned with USCDI-v3 standards.

Improve accuracy and standardization in specimen classification with the ability to add SNOMED codes when configuring and documenting specimen collection in TouchWorks EHR, supporting USCDI-v3 standards.

Improve precision of pregnancy status documentation with new optional answers for the existing Pregnancy Status orderable item, compliant with USCDI-v3 requirements.

Effortlessly **verify document submission in CED Auto Submit with an enhancement that defaults to displaying only 'Complete' items,** streamlining review and ensuring timely patient portal updates.

Eliminate confusion when ordering injectable medications with package forms no longer rounding in the display.

Streamline billing by ensuring that **Admin Initial and Additional Charge codes for medication administration are automatically applied** during the Record Administration workflow, reducing manual effort and errors.

Stay current and ensure compliant data exchange for USCDI-v3 standards with additional pre-delivered mappings for the Industry, Patient Occupation, Recipient Type (patient care team role) and Sex dictionaries.

Support accurate health status assessments by capturing pregnancy intentions using a new optional Pregnancy Intent orderable item, compliant with USCDI-v3 requirements.

Get ahead on regulatory compliance with upcoming standards for 'name to use', ensuring patients are addressed by their 'Preferred Name'.

Document multiple medication history items without interruption, scroll position in Add Clinical Item is now maintained.

Experience **seamless workflow improvements with immediate visibility of newly assigned task views in your Inbox,** eliminating the need to sign out and back in.

TouchWorks EHR 2025.3 and later
What's Next? A sneak peek of what is *coming soon*.

Altera is focused **on planning the next release of TouchWorks® EHR**, providing exciting enhancements and keeping satisfaction at the heart of meeting regulatory requirements. No hot fixes are planned. Be sure to attend **the quarterly client webinars** for the upcoming blueprint.

Planned for 2025.3 and later

Regulatory: USCDI-v3 completion and certified regulatory compliance

Release of Integrated Scan

Continued progress on Note+ (AI-enabled Note)

Replace current Problem terminology with MEDCIN

Help shape the TouchWorks EHR solution

Join our **TouchWorks EHR Feature Feedback and Mastermind Webinars!**

We want to hear your thoughts and feedback on the proposed new feature requirements and design for TouchWorks EHR. The Mastermind sessions give you (our clients) the opportunity to ask questions about TouchWorks EHR and its future.

The sessions are open to all clients and user roles, and the meetings will be interactive to give us (and you) an opportunity to talk with and hear from other TouchWorks EHR clients.

View the webinar schedule **here** (a Client Portal login is required).
